The activities and goals of the afternoon club

The afternoon club is intended for all school children in first and second grade as well as for children with special needs, who require afterschool care and social and physical activities in a safe environment.

Our daily club activities are chosen on the children's terms, whether it's indoors and outdoors. The afternoon includes both instructed and free activities. We provide an afternoon snack, and offer many kinds of activities ranging from exercise and play to arts and crafts.

In the Lasten Liikunnan Tuki afternoon club, we provide children with guidance and support in their everyday lives. We offer a holistic approach to children's well-being, as well as learning through playful exercises and social activities. When planning our activities, we take into account the local school curriculum, the children's age and level of development by including the appropriate amount of learning content in their play. In schools, we operate as part of the pedagogic system. The values we strive for are quality, trust, community, and equality.

The activities are instructed by trained professionals, who aim to make your child's afternoon as meaningful and safe as possible. We collaborate closely with teachers and parents, in order to support children's development and learning, and to offer guidance in their everyday lives.

The afternoon club is in operation during school semesters on Mon-Fri at 11-17.

You can learn more about our afternoon club by calling your desired club location directly. The locations and their contact information are found at the bottom of [this page](#).
