

PLATEPADDLE

Plastic or paper plates make for great tennis rackets! With these platepaddles, you can bounce around a sockball, a balled up piece of newspaper wrapped inside a small plastic bag, a plush toy, or a balloon.

Attach a string across the room and step on opposite sides. Can you strike the item over the string with the platepaddles?

How many back-and-forth passes can you get before the item hits the floor?

Body control,
hand-eye coordination
